**Patent Title:** URBAN TRANSPORTATION AND LOGISTICS SYSTEM

**Maori Conflict possible:** No

**Traditional knowledge:** No

**Abstract:** The invention relates to transportation and logistics systems for large cities, and may be used when building a city of more than five hundred thousand inhabitants. The technical result of the proposed solution consists in optimizing an urban transportation and logistics system, eliminating transport congestion and providing quick travel to any point in a city. An urban transportation and logistics system comprises a first ground level for road and rail freight transport, a second level for piping and utility lines, a third level for passenger transport, and a fourth level for pedestrians, wherein each level is located one above the other, and the levels are connected to each other and to residential and non-residential buildings by means of vertical stair-lift modules.
